

WATER SEEPAGE OR LEAKAGE COVERAGE

Protect your home from water damage with Safeco.

Water damage can wreak havoc in your home. Do you have the coverage you need?

There are multiple types of water damage coverages. Some are automatically included in your home policy, others must be added separately.

For slow, continuous leaks that may go undetected, you should consider adding **Water Seepage or Leakage coverage**. These small leaks often don't become apparent until they cause severe damage to a surrounding wall or ceiling.

Contact your independent Safeco agent to discuss adding Water Seepage or Leakage coverage to your policy today.

With this optional endorsement from Safeco you'll be protected if:

- ✓ Damage is caused by an accidental, continuous seep or leak
- ✓ Damage results from an unknown or hidden issue that occurred for a period of 14 days or more
- ✓ Damage is caused by water or steam within a plumbing, heating or air conditioning system or from within a household appliance

This coverage does not include damage from:

- ✗ a sump, sump pump or related equipment
- ✗ a roof drain, gutter, downspout, exterior drain, or similar fixtures or equipment
